

ARKANA®

ADVANCED BEAUTY CARE

NEURO THERAPY TO EVEN OUT THE COLOR AND BRIGHTEN DISCOLORATION

UniTone Neuro Therapy

Good skin tone after just 4 weeks

ARKANA goes beyond the borders of traditional skin care and offers neurocosmetics. Reaching for the latest achievements of neuroscience, biotechnology and cosmetology, the experts of the brand have created neurotreatment that uses unique substances - neurotransmitters. Thanks to them, you can improve the disturbed mechanisms of functioning at the neurosensory level. Result?

Visibly brightened discoloration, rejuvenation and unified skin tone

^ **Visibly brightened discoloration of any type**

^ **Even skin tone**

^ **Prevention of discoloration after laser treatments, treatments with acids, IPL**

UniTone Neuro Therapy - good skin tone

Innovative neurosensory skin care treatment:

- uneven skin tone
- skin prone to discoloration
- after acid, laser and IPL therapies

Professional NEUROregulation of skin tone

UniTone Neuro Therapy uses the highest recommended concentration of active ingredients with properties of brightening and preventing discoloration of any type.

Peptides and active ingredients:

- ▲ high activity and quick effect
- ▲ evens out the color
- ▲ decrease the visibility of stains and discoloration

Innovative encapsulated B-White™ peptide is closed in a flexible carrier with a capsule allowing the deepest skin layers to be penetrated.

1. SKIN WITH DISCOLORATION

2. PENETRATION OF ACTIVE INGREDIENTS DURING THE THERAPY UNITONE NEURO THERA

3. SKIN DISCOLORATION REMOVAL EFFECTS ARE VISIBLE AFTER JUST 4 WEEKS!

TRANEXAMIC ACID (TXA)

- ▲ reduces the risk of discoloration after intense exfoliation treatments
- ▲ prevents the appearance of post-inflammatory discoloration
- ▲ soothes itching, aedema and redness

NIACINAMIDE

- ▲ inhibits the transport of melanin to keratinocytes
- ▲ removes free radicals

LICORICE EXTRACT

- ▲ has brightening properties
- ▲ soothes irritation

VETICELL®C

- ▲ Vitamin C in two forms
- ▲ evens out the color and brightens the skin
- ▲ strengthens blood vessels

Did you know...?

Melanocytes are pigment-producing neural cells. The emergence of discoloration is a complex process conditioned by numerous factors. Therefore, the most effective weapon in the fight against skin discoloration and uneven skin tone is neurotransmitters aimed at the elimination of the source of the problem.

UniTone Neuro Therapy - your weapon in the fight against skin discoloration of any type.

Fight against discoloration of different origin:

● HORMONAL

● POST-SUN

● POST- IFLAMMATORY

● VASCULAR

Treatment to brighten discoloration and even out skin color

ADVANTAGES OF THE TREATMENT:

- ▲ Effective fight against skin discoloration of any type
